## Blockchain for Good Moderator

### Abstract

Blockchain technology is a disruptive technology that will have a massive impact on society. For the first time in the history, people start to delegate trust from people and institutions to machines and processes. How can we make sure we use this technology to make this world a better place?

### Biography

Toni Caradonna studied and degreed in physics and philosophy. He teaches part-time at the Universities of Chur and Bern in Switzerland, and he runs an innovation company - Swisscoast.

He is active in the Blockchain community since 2015, and he is the programmer of the world's 1st Ethereum Smart Contract for UNICEF. As a member of the Porini. Foundation he is doing a Blockchain Process Mapping for the IUCNs Green List project. Toni Caradonna also is the producer of the worlds 1st Ethereum funded movie.
