WE ENABLE
SUSTAINABLE GROWTH
IN AFRICA

Nov 2020

VISION

Dynamis kick-starts vital infrastructure projects
by providing
early capital & know-how,
hence contributing to growth and a
better life in Africa!

Africa has HUGE Potential

... But also challenges !

Lack of:

Water

Electricity

Transportation

➔ Problems & Limited Growth

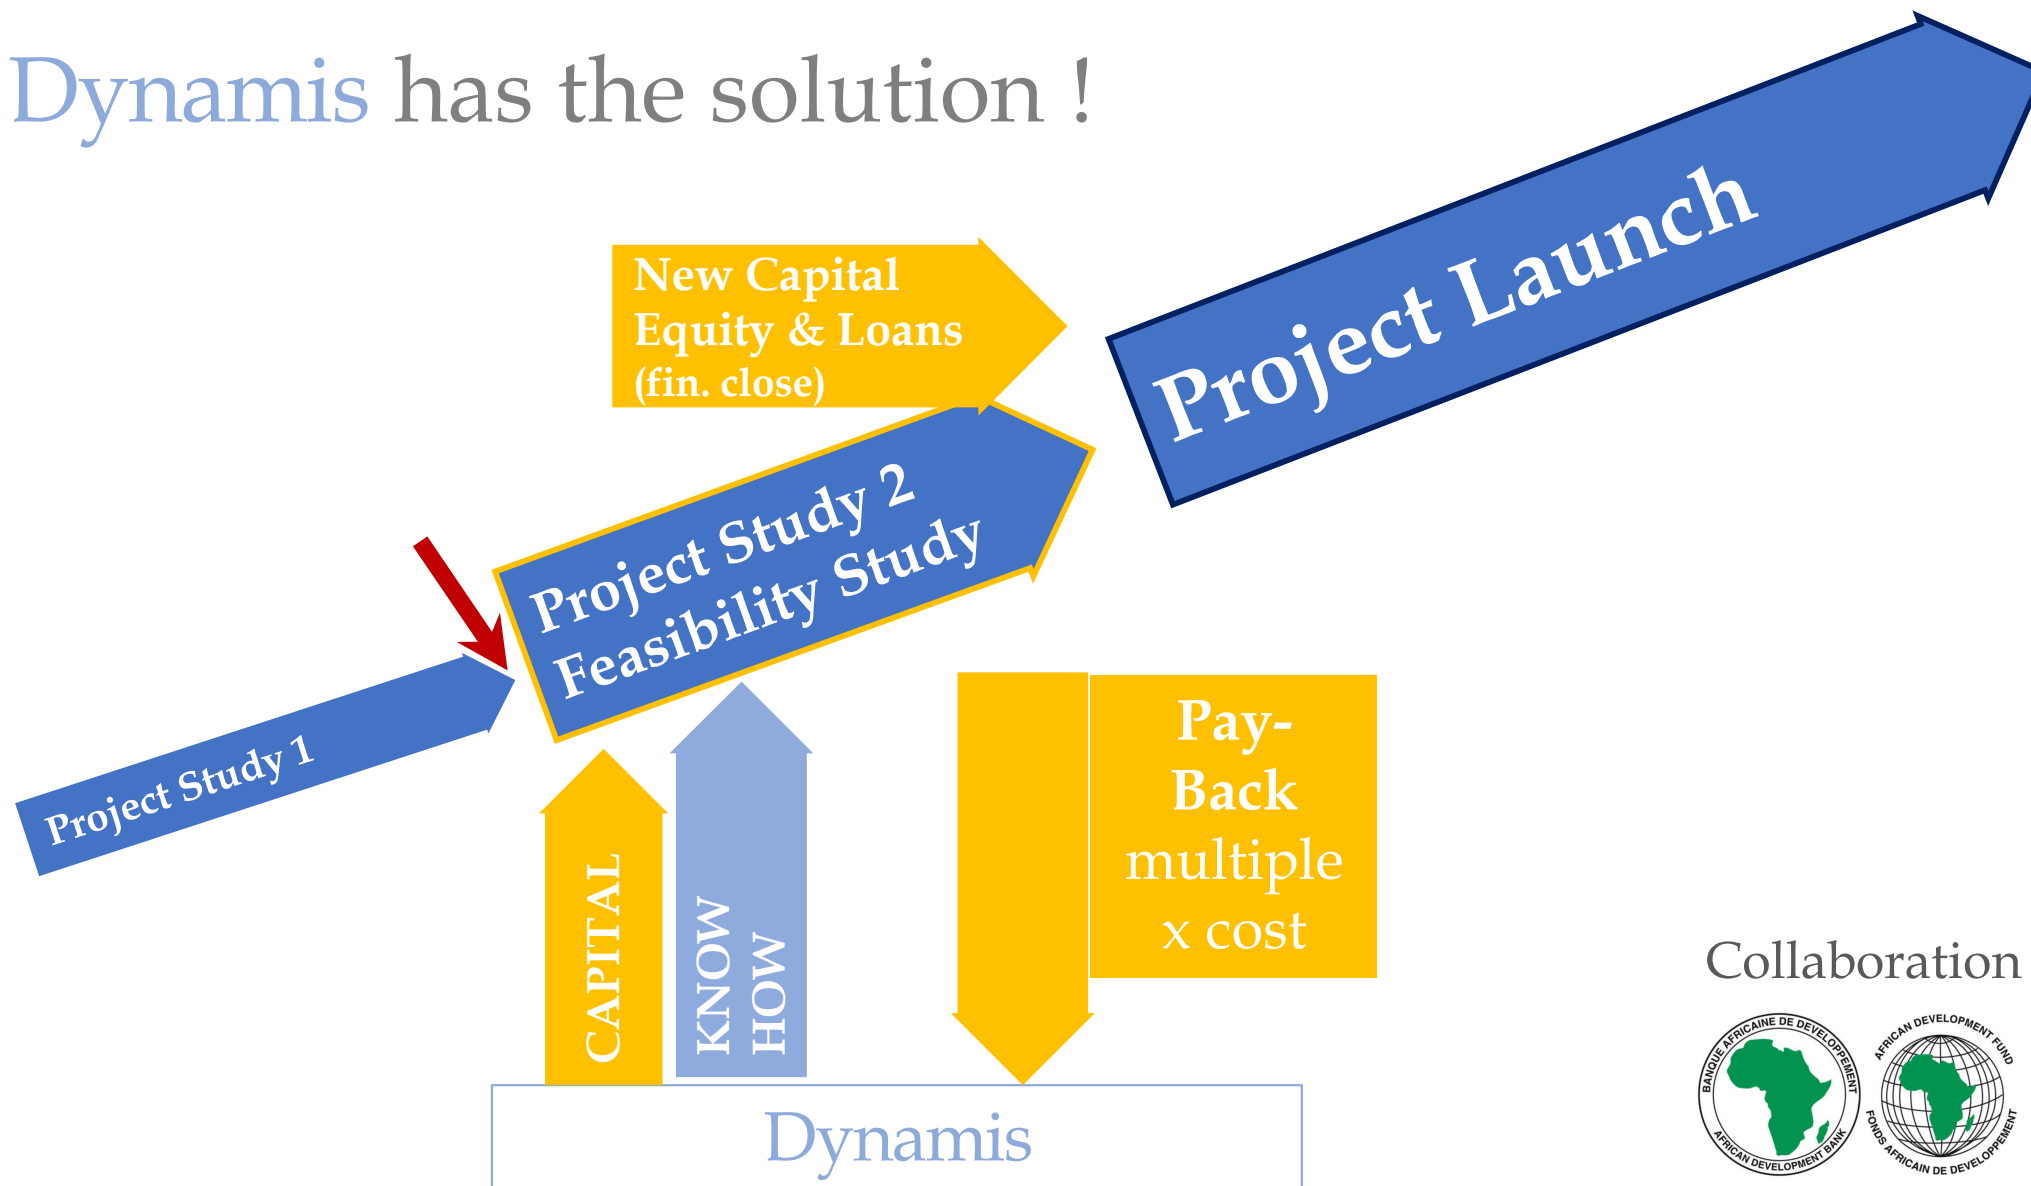

Lack of:

Capital for early development of projects

➔ Many projects are blocked

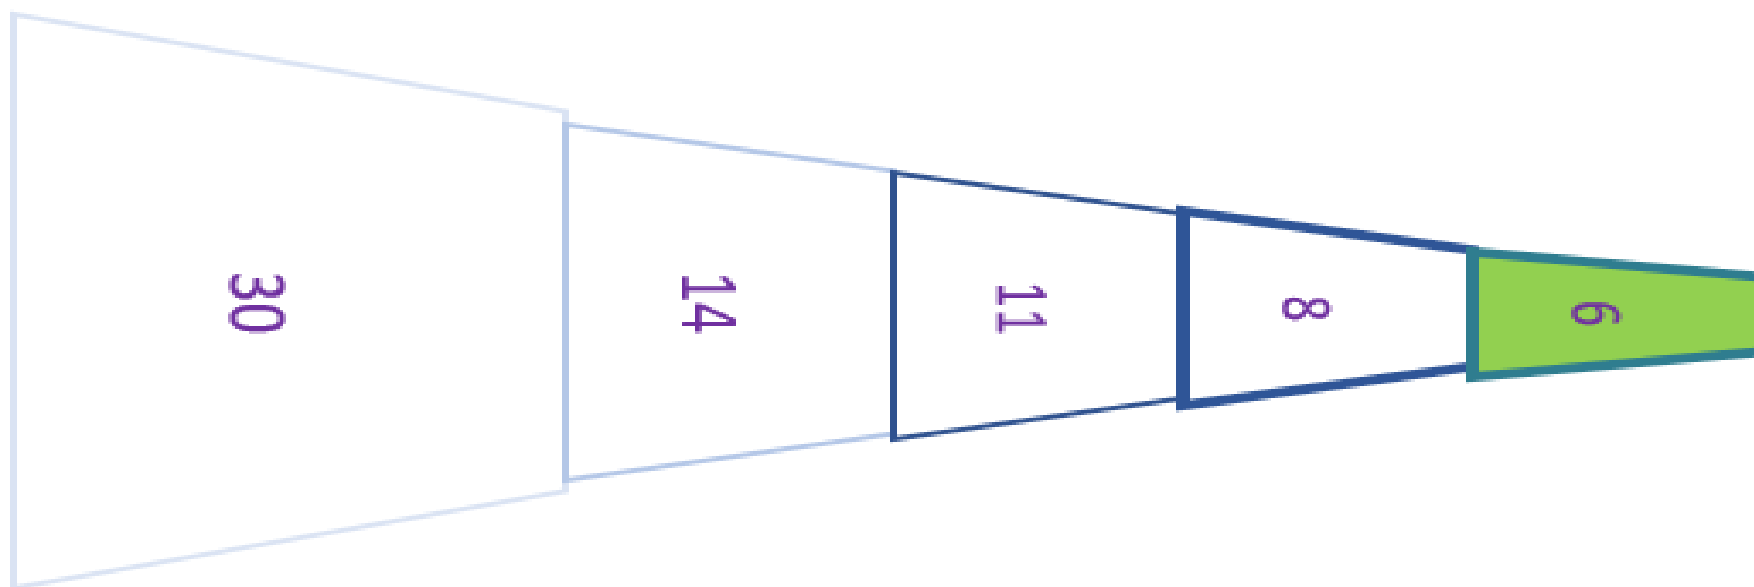

Dynamis has the solution !

Collaboration w

Staged processes: effective use of capital & time

Risk Balancing Pool

Typical Projects

- Power Station (Hydro, Wind, Solar)
- Power Station (BioMass)
- Power Station (Natural Gas)
- Water Desalination plant
- Railroad / Trains / Trams / Electric Buses
- Hospital
- Resort/Hotel

* Already identified candidates

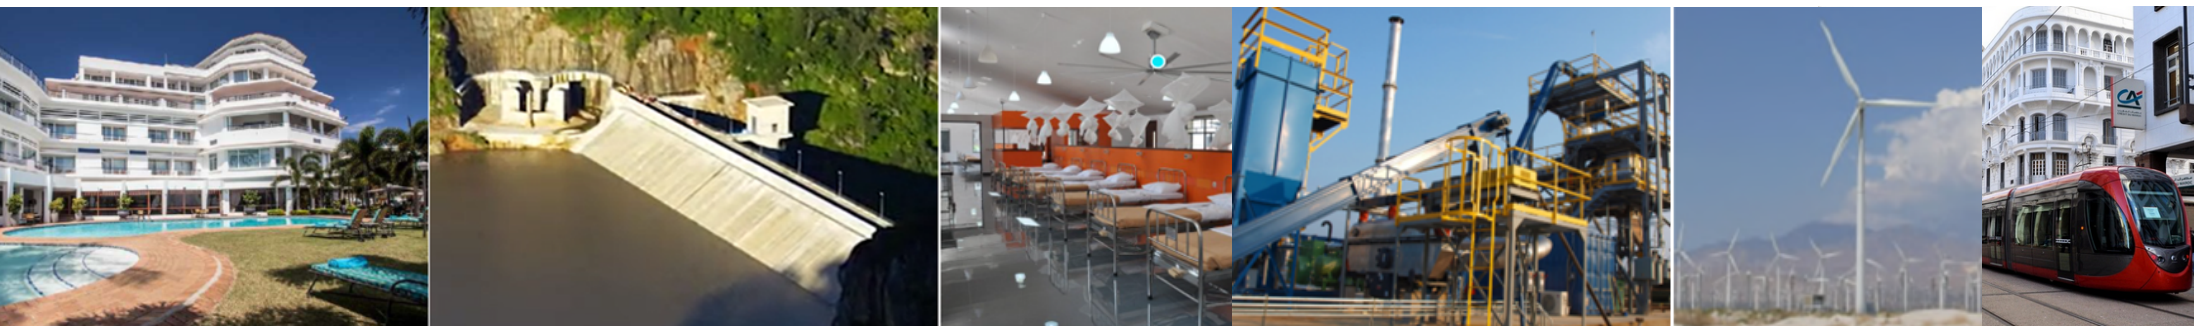

15 – 250 MW * *

10 – 50 MW *

40 – 300 MW *

20 – 95 000 m³/d*

40 – 200 rooms *

Why we ensure a high success rate:

- ✓ We choose the best projects
Good selection process
- ✓ Early Involvement by Investors & Banks
Easier to get them on-board
- ✓ Staged Process
Halting bad projects early, reducing losses
- ✓ Excellent Network in Region and Financial Sphere
- ✓ Good Track Record
We know how to ensure project success

Directors & Advisory Board

- Mr Johan Frössling, MD
M.Sc. Chem. Eng.
Project Governance / Europe & Africa
Network w Investment Banks, Investors
Speciality: Energy Infrastructure Investments
- Mr Richard Colling, Director
M.Sc. Mechanical Engineering
Project Management / Europe
Speciality: Transports Infrastructure Investments

- Advisors
Bo P Löfgren, Göran R Svensson, Pär-Eric Lantz, Doug Kuni

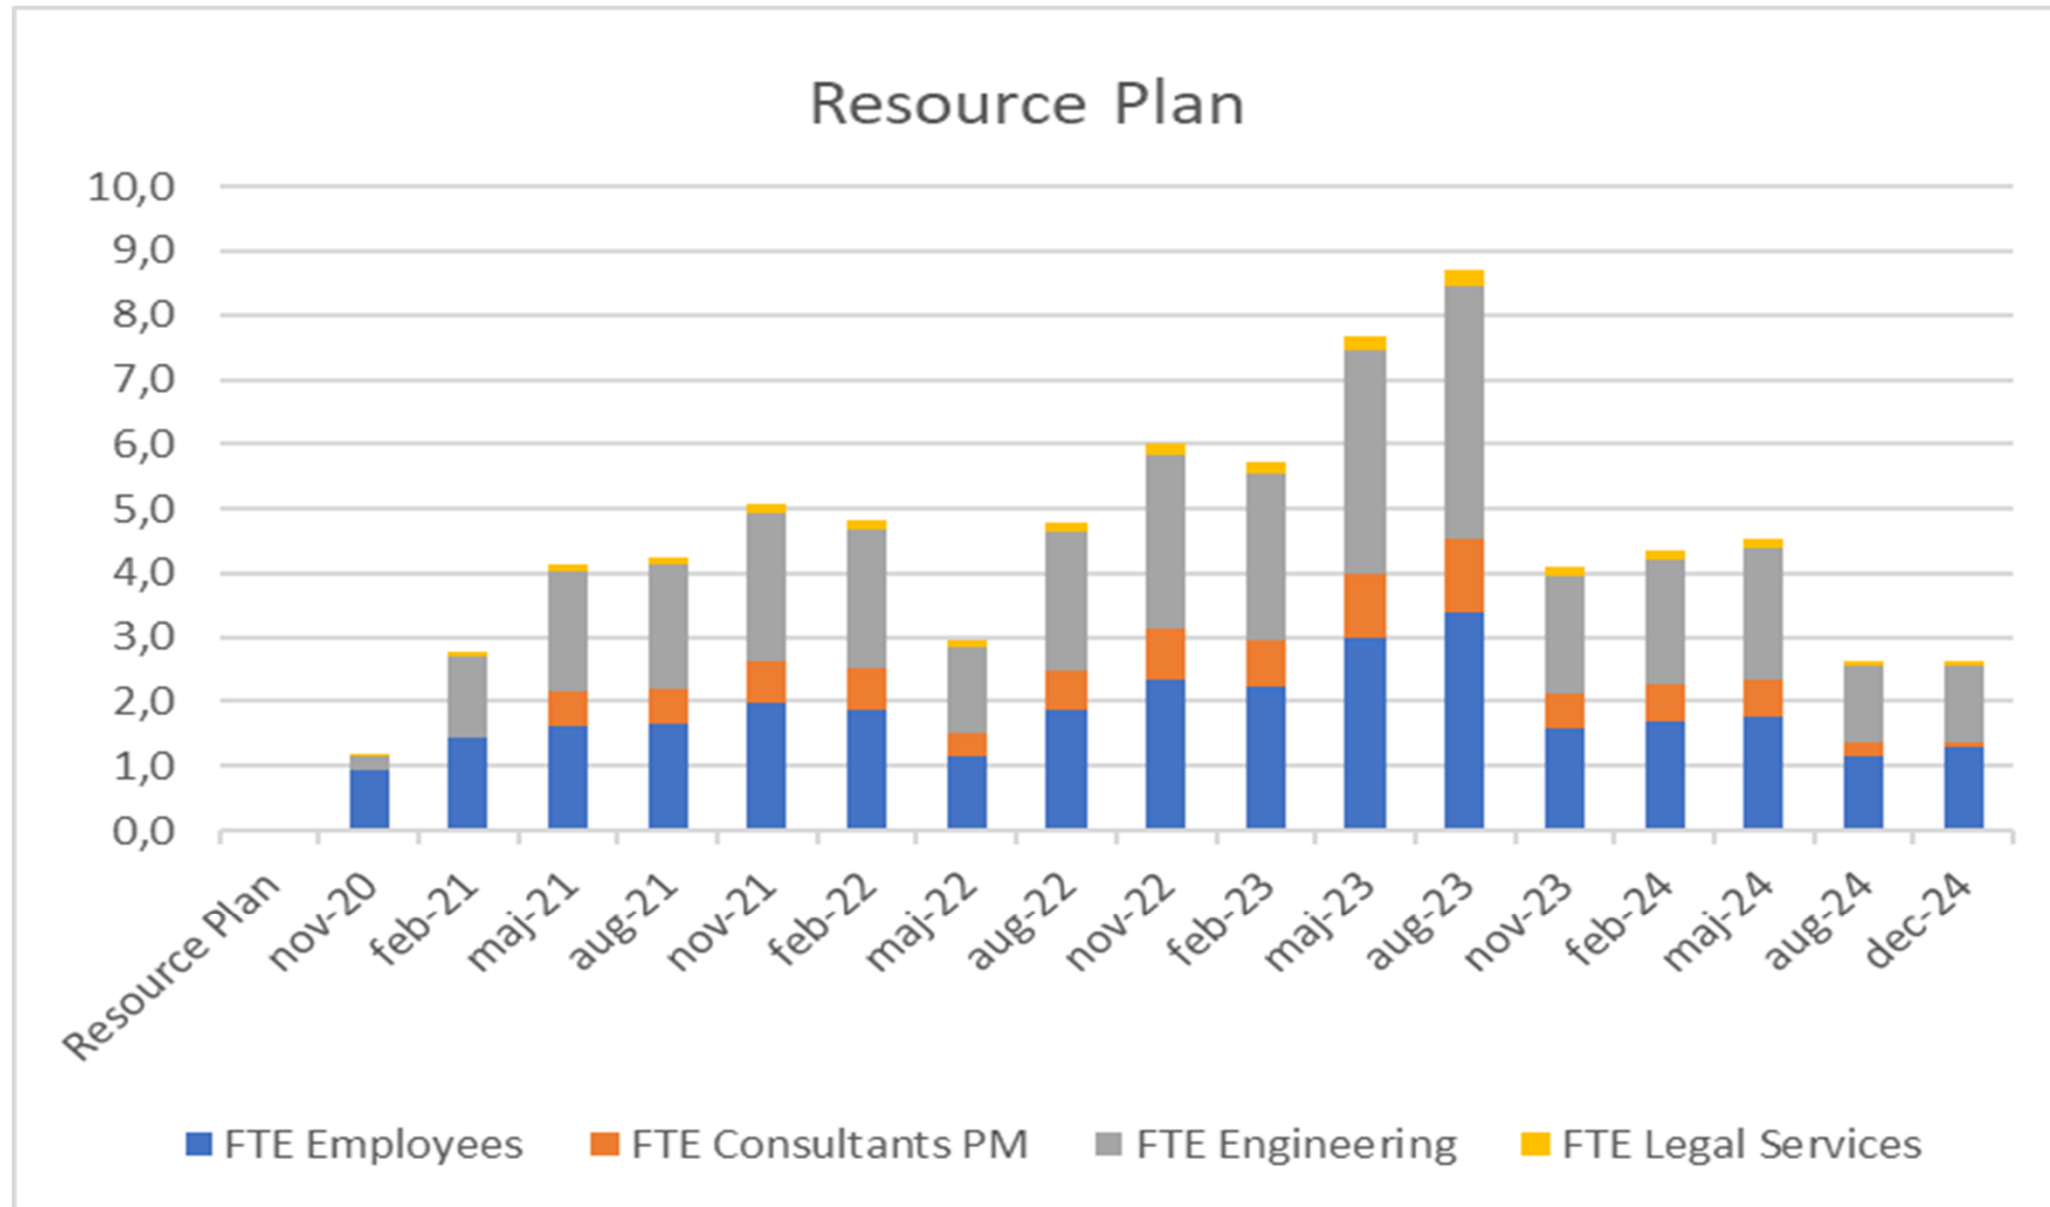

Dynamis contributes to UN Global Goals for Sustainable Future

- In 2015, world leaders agreed to 17 goals for a better world by 2030 – “The 2030 Sustainability Goals”. Guided by the goals, governments, businesses, civil society and even individuals should work for a better future: www.globalgoals.org
- Africa has developed enormously the last 2 decades. In most countries however, the transformation is too slow. With current nativity ratio, the GDP growth is too low to substantially lift an entire population. And without a substantial lift in standard of living, the nativity will remain high in several countries.
- Sub Saharan Africa does have a great potential for growth and a higher standard of living, but there is still lack of important infrastructure as power, water, transportation. That means direct challenges for the people in the region, since they need to spend more time for cooking, washing, commuting. It also means less ability for the society to attract job creating industries, and hence the growth is severely hampered.
- One specific problem is the lack of capital for early project development, which means that many vital infrastructure investments are blocked.
- Dynamis has experience and competence to pave the way for and achieve installation of critical and sustainable infrastructure, which will help millions of people – in their daily life and to a sustainable future.
- Dynamis has committed to IFC’s [Equator Principles](#), minimising project risks related to Environmental and Socio-Economic Impact.

Resource Plan

Approx. 50 %
is engineering
- Outsourced to
GIBB and WSP

Dynamis Base Team – shared with **Confidere**

Sweden, Gothenburg & Stockholm

- Johan Frössling MD
- Jenny Ramtzen Administration & Research
- Richard Colling PM & Strategy
- Mattias Bernizé Field PM
- Ninwa Yusef Planning & Coordination

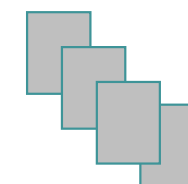

South Africa, Joburg

- Eva Shaw Regional Director
- Siboniso Mazibuko Market & Communication Research
- Doug Kuni Senior PM, Energy Projects
- Resource Pool via Advance

Associated GIBB & WSP South Africa Teams in Joburg

Plus more sub contracted consultants, when needed e.g.

- Sweden/SA: Bo Wallander Senior PM, major projects
- Rwanda: Nsengi Barkabuye Research, PM, Coordination
